

Senior Systems Integrator San Antonio TX

About Us: CNF is an award-winning full-spectrum cyber operation, systems engineering, and research and development firm, founded in 2005 and headquartered in San Antonio, Texas. CNF is recognized as one of San Antonio's largest and fastest growing cybersecurity providers. We are a well-known employer of choice and trusted Government services provider in developing, testing, fielding, sustaining, and employing Cyber weapon systems and technologies for Offensive and Defensive Cyber Operations, Cybersecurity Risk Management, and support to Law Enforcement and Counterintelligence operations.

Functional Responsibility:

As a Senior Systems Integrator, you will lead a team of integrators and technicians in designing, coding, and testing applications and software in accordance with operational requirements, established quality standards, and production schedules. Demonstrate proficiency in JAVA, C++, or python application engines. Analyze and model data and business processes. Design and architect enterprise-wide automated systems leveraging existing tools and technologies. Develop and test code to combine various information assurance technologies into a single, integrated solution. Document the design, code, and testing of this application.

Minimum/General Experience: 4+ years of experience related to a specific, engineering or computer science discipline such as: communications, network, systems, or software engineering in support of telecommunication systems and networks, information technology tools, or software development. Extensive experience in the development, integration, and implementation of enterprise-wide network or information assurance technologies. Experience with the integration of large automated systems or networks in a global, multi-platform environment. Technical experience in system and network administration, analysis, and database administration and/or programming.

Top Secret Clearance Required.

Required Qualifications:

Bachelor's degree in computer science, engineering, or related technical discipline. With a Master's degree, only 2 years of experience in engineering or other technical field is required.
