

Port San Antonio's planned facility will host additional cybersecurity and other advanced technology operations.

Port San Antonio's 1,900 acre campus is home to some of our region's top industries.

Cybersecurity | Aerospace | Advanced Manufacturing

An upcoming complex in the heart of the Port will support the expansion of these industries and those who contract with them. The new development is adjacent to the 24th Air Force headquarters and other Department of Defense cybersecurity operations. And close-by, the Port's industrial airport is home to large operations conducting aerospace maintenance and upgrades as well as advanced manufacturing activities.

Phase I

- 90,000 square feet (completion by early 2018)
- Suites starting at 2,500 square feet
- Build-to-suit finish-out
- Sensitive Compartmented Information Facility (SCIF) options
- Access to full suite of AT&T telecommunications infrastructure
- 10 minutes to downtown San Antonio

Our in-house experts provide ongoing strategic support to our customers:

- Construction management / building permitting
- Property management / maintenance
- Business development / marketing
- Public advocacy / governmental affairs
- Review of applicable incentives
- Workforce development partnerships and funding

Over 1,000 cybersecurity professionals already work on the Port campus.
