

COMPREHENSIVE INDUSTRY SUPPORT

The Alamo City is home to our nation's second-largest concentration of cybersecurity experts—and growing. Over 1,000 of those industry professionals are based in Port San Antonio's large campus—a proven strategic partner to the region's cyber community.

Our customers serve defense and private-sector operations, including banking, aerospace, medical and other industries.

In close collaboration with our customers and partners, we're growing an environment where cybersecurity is thriving as it captures opportunities in our region, across the country and around the world.

A HOME FOR LEADERS

Cybersecurity operations at the Port are anchored by the national headquarters for the 16th Air Force, also

known as the Cyber Command. Here, hundreds of uniformed and civilian personnel protect the integrity of the Air Force's IT assets around the world.

Private-sector firms are also growing at the Port. They're here to support Department of Defense cyber operations on our campus and throughout the region, as well as a growing private-sector clientele.

STRATEGIC SPACES

- Move-in ready finished-out to customers' specifications
- Sensitive Compartmented Information Facility (SCIF) options available
- Access to full suite of AT&T telecommunications infrastructure
- State-of-the-art meeting/conference facilities for up to 200 people

Our 1,900-acre campus is the single-largest commercial property in the region. And we have plenty of room for growth.

We're within 2 to 20 minutes driving distance from other major technology hubs, including the 16th Air Force, Lackland Air Force Base, downtown San Antonio, the city's medical center and major area manufacturers.

Available spaces for start-up and established cybersecurity operations range from 2,500 to 32,000 square feet.

COMMITTED PARTNERS

For nearly 20 years, our mission has been to serve as a big economic engine for San Antonio: Our success is directly measured by our customers' success.

To achieve this, our in-house team of business development professionals works hand-in-hand across our industries to support their growth strategies, including identifying and pursuing new markets.

We also collaborate with many local partners who share our passion to grow San Antonio's standing as a top destination for cybersecurity operations and innovation.

CyberSecurity San Antonio

NEW SPACES FOR CYBER / ADVANCED TECHNOLOGY

A newly-completed technology building in the heart of our campus is a 90,000-square-foot modern facility specifically designed to meet the security and telecommunications needs of the cyber community. Spaces begin at 2,500 square feet.

The facility is the first phase in a multi-building complex to support cybersecurity and other advanced technology operations

Like Building 1, this 174,000-square-foot facility accommodates additional offices for cybersecurity, DoD and other operators who require secure and customized finish-outs. Available spaces from 2,000 to 80,000 Square Feet.

TECH PORT: CONNECTED WORLD | CONNECTED SOLUTIONS

The challenges and opportunities of an increasingly connected world require connected solutions. Tech Port is our vision to grow an innovation campus that:

1. Connects people with opportunities;
2. Connects education with employers; and
3. Connects buyers with sellers.

We're moving ahead with an initial set of facilities in the heart of our campus to achieve and reinforce these connections. Planned for completion in 2021, the upcoming facility will be an Innovation Showroom and Education Center prototype. It will be the cornerstone of a full Innovation Campus connected to the region's key talent, educational institutions and researchers, in turn connecting with capabilities to sell innovations to a global market.

TOP-TIER TRAINING

A global center for cybersecurity excellence begins with world-class educators.

The University of Texas at San Antonio – Among the nation’s top undergraduate and graduate programs in cybersecurity.

Alamo Colleges – The region’s community college district, offers an array of information technology degree and certificate programs.

Alamo Academies - Part of Alamo Colleges and neighboring the Port, the nationally-acclaimed dual-credit program provides college-level training to top high school students in advanced technology, including cybersecurity.

Dynamic Advancement– An IT Training and Certification company providing industry-leading technical training.

Hallmark University– An innovative San Antonio-based nonprofit university, the school offers a bachelor’s of IT with a concentration in cybersecurity and other degree and certificate programs.

IOMAXIS– A technology engineering company that provides solutions and services across the technology spectrum.

IPSecure– A local cybersecurity firm that provides an array of training services to private- and defense-sector information security professionals.

A GLOBAL HOME FOR CYBERSECURITY

Today, over 1,000 cyber personnel work on the Port campus. Anchored by the 16th Air Force, private-sector firms are very quickly establishing and growing operations to support Air Force cyber and intelligence at the Port and elsewhere in the region and around the world.
